(54) Title: THE SOLID DISPERSION OF TACROLIMUS

(57) Abstract: The present invention relates to the carrier of the solid dispersion of tacrolimus, which is prepared by using the solid surfactant having a property of HLB value higher than or equal to about 7. The surfactants carry out a function of a carrier and a function of a dissolution enhancer, simultaneously. As a result, the dissolution rate of tacrolimus is improved, and the oral absorbability and the bioavailability may be increased due to rapid drug release.
